

Steven Magee

Dear Ann Smith,

Please find attached my resume for the Manager of the MDM Observatory. I have already held this position and fell into extremely poor health due to the Sick Building Syndrome (SBS) that is present at the MDM observatory and also was present at my own home. The management team witnessed this severe degradation in my health during my time there and my own doctor failed to identify the root cause of the conditions that were showing up, despite many visits to specialists. After leaving MDM, I later identified the sources of environmental pollution that were causing these wide ranging conditions and have rectified them. Fortunately for me, I am one of the lucky few people who has successfully reversed declining health into good health.

I have excellent management skills and I have managed large numbers of employees with a wide range of skill sets. I have worked extensively in the university and astronomical environments and I am fluent in mentoring students and staff. I have first class skills in astronomy and I have worked at the premier facilities in this field, including the W. M. Keck Observatory. I am expert in control systems, construction, large telescopes, astronomical instrumentation, adaptive optics, interferometry, and laser guide stars. I have worked with the leading astronomers in the world during my time in the observing team at the W. M. Keck Observatory.

I am extensively published and I have made many astronomical discoveries. My research in the field of astrophysics is currently very active and I have many more publications in development. I am currently developing the fields of astronomical and man-made radiation. The astronomical environment and how it relates to nature has been overlooked by many astronomers and it has far reaching consequences to life here on Earth. I would welcome the opportunity to join the MDM Observatory and to develop research in this area. I expect to publish many discoveries on this subject in the near future. Indeed, I have discovered new forms of radiation called "Nighttime Interference Radiation", "Tree Canopy Interference Radiation", "Satellite Interference Radiation", "Electromagnetic Blue Sky", "Extinction Wavelength of Light", "Extinction Energy", and the "Archimedes Death Ray" in developed human environments. I have extensively pioneered the science of the ground level human radiation environment. You will find this knowledge and vision to be a valuable addition to your team.

I would welcome the opportunity to return to MDM Observatory and to rectify the sources of Sick Building Syndrome that I have identified at your facility.

I suspect that some of this behavior is symptomatic of the Sick Building Syndrome that is present at the facility. I look forward to arranging an interview with you in the near future and I hope that you choose to return your staff to good health. You have a legal requirement to provide a safe workplace.

Yours sincerely,

Steven Magee

# Steven Magee CEng MIET BEng(Hons)

A world class Consultant with extensive experience gained on several leading facilities with a comprehensive engineering background and excellent leadership skills. An expert in astronomical research, solar power systems, radiation, nature, and the medical fields.

## Career

### Author & Consultant

Authored the premier books in solar radiation and human health, and they are now available on [www.amazon.com](http://www.amazon.com). Providing consulting services for industry. My research videos are available at StevenMageeBooks on [www.youtube.com](http://www.youtube.com). Some of my discoveries are:

#### Human Health:

- Found the cause of cancer (incorrect human environmental conditions).
- Found the preventative measures for cancer (correct human environmental conditions).
- Found the primary cause of Autism and Attention Deficit Disorder (excessively filtered sunlight by low-E coated double glazed glass combined with unnatural electromagnetic radiation exposures)
- Found the preventative measures for Autism and Attention Deficit Disorder (increased outdoor sunlight exposure in a green environment combined with removing the unnatural electromagnetic exposures)
- Found links between solar radiation and human health issues.
- Found links between artificial radiation and human health issues.
- Widespread radiation sickness in modern human society from the effects of unnatural solar radiation, man-made radiation, and electromagnetic radiation and interference.
- Found that global warming, climate change, and human activities may be in the process of moving the electromagnetic environmental conditions outside of what the human can survive in long term.
- Found that the natural average age of the human has been unnaturally extended from 65 to 78 due to unnatural radiation exposure from human activities and changed atmospheric radiation transmission due to the effects of pollution.
- Found that the background radiation levels in the human environment have been significantly increased due to the widespread adoption of large numbers of radioactive (ionizing americium) smoke detectors into the average home and workplace.
- Found that exposure to the electrical system (harmonic and dirty electricity) and certain electrical and electronic products induces depression symptoms into the human.
- Found that certain electrical and electronic system exposures are a toxin to the human and that removal of the exposures causes withdrawal symptoms to occur.
- Found that microwave and radio transmissions are causing a toxic effect to occur in the human body and that by reducing the exposure causes a withdrawal reaction to occur.
- Linked breast cancer to disturbances in the Earth's natural magnetic field and electromagnetic radiation exposures from metal under wires.
- Developed the cause of allergies to pollen (Pollen Deficiency).

- Developed the causes of allergies to sunlight (Sunlight Deficiency, filtering, interference, and overexposure).
- Developed the causes of allergies to nature (Nature Deficiency).
- Developed the causes of general allergies (Environmental Poisoning).
- Found that the human has the genetics of an outdoor forest animal.
- Found that the human mind and body does not perform correctly away from the presence of a tree canopy.
- Light and electromagnetic radiation induced mental and physical illness.
- Biological cellular development and mutation problems in unnatural radiation environments.
- Found that extensive photosynthesis effects are taking place within the human body.
- Found that the human body goes deficient in both vitamin B12 and D when kept out of sunlight.
- Characterized the different human skin types and their solar radiation environment.
- Found that the human is genetically adapted to its latitude and longitude global location and significantly changing this may bring about illness and disease.
- Humans that have significantly changed their genetic environment have to pay special attention to keeping it within the boundaries of their genetics, otherwise general illness occurs.
- Found that environmental pollution is significantly changing the radiation levels in the human environment and this may bring about cellular development problems, illness, disease, and premature death.
- Electrical poisoning from anti static devices (ASD) and grounding (earthing) systems.
- Developed the field of plant growth defects in the areas of electromagnetic interference, AC stray voltage and currents, solar radiation, toxic light, and nighttime interference radiation.
- Linked the cause of Sick Building Syndrome (SBS) to coated double glazed glass (Low-E), artificial light, softened and demineralized water, contaminated air, contaminated food, electromagnetic radiation and interference (EMR/EMI), americium radiation exposure, and AC stray voltage effects.
- Developed the field of human aggression (Environmental Pollution).
- Interpreted the famous 1991 Barbury Castle crop circle: Energy systems are causing interference and the wheel is in motion for cellular growth to turn off.
- “Toxic Bucket” theory.
- The “Radiation Detoxification” process (Hibernation).
- Discovered that electromagnetic radiation and interference is a stimulant to the human mind and body, just like alcohol and drugs.
- Characterized electromagnetic interference exposure in the human body: Headaches, increased sexual desire, changed personality, aggression, and fatigue. Over exposure leads to general illness, arthritis, depression, dementia, mental illness, cancer, and premature death. These are documented as Radio Wave Sickness (RWS) and Electromagnetic Hypersensitivity (EHS) in the medical community.
- Found that the human mating and fertility cycle is triggered by electromagnetic radiation and interference from seasonal electrical storms.
- Found that the modern human is overloaded on electromagnetic radiation and interference from daily exposure to it and is unnaturally in a constant state of sexual desire.
- Independently verified much of the work that was performed by Dr. John Nash Ott regarding health, light, and electromagnetic radiation and interference.
- Discovered that extended exposure to canned food causes tooth decay, skin problems, stomach problems, acid reflux, indigestion, and heart burn. It is simply fixed by eating organic food.
- Found that the rising Autism rates are almost exactly following the rising adoption of cell phone towers and cell phones.

## Electromagnetic Interference:

- “Extinction Energy” theory.
- “Electromagnetic Blue Sky” theory.
- “Electromagnetic Population Growth” theory.
- Found that harmonic (dirty) electricity is toxic to the human mind and body.
- Found that exposure to high voltage, high current, and high harmonic energy can interfere with the sense of smell to report burning smells to the brain that are not there. It is accompanied by insatiable thirst and intoxication symptoms.
- Found that the electrical distribution system is in the process of turning into an unlicensed wide-band radio transmitter due to a high penetration of electronic products. This may cause radio wave sickness and electromagnetic hypersensitivity to occur in many people.
- Found that many electrical utility poles are emitting large amounts of radio waves into the human environment. They are unlicensed wide-band radio transmitters.
- Found that utility power lines and poles have many fields around them including ion, electric, electrostatic, magnetic, radio, radio reflection, radio interference, solar reflection, solar interference, microwave reflection, microwave interference, and so on. These fields vary with the time of day, the seasons, and the type of power generation in the area.
- Found that the utility transmission and distribution system may be acting as broadcast antenna system for 50Hz, 60 Hz, and harmonic energy into the Earth's core and atmosphere.
- Found that home and workplace electrical wiring is emitting large electromagnetic fields of various types into the human environment which made lead to sickness and developmental problems in the human.
- Developed the theory that in the Air France flight 447 crash, the pilots appeared to be in a state of intoxication from the effects of excessive electromagnetic radiation (EMR) storm exposure.
- Excessive electromagnetic interference from many laptop computers.
- Found that laptop computers interfere with the Earth's natural magnetic field.
- Excessive electromagnetic interference from many flat screen digital TV's.
- Excessive electromagnetic interference from many consumer products and toys.
- Excessive electromagnetic interference from transport systems, including cars and motorbikes.
- Electromagnetic interference from electronic power conversion systems (inverters) and the effects on human health.
- Solar photovoltaic (PV) electromagnetic interference and the effects on human health.
- Discovered street light induced sickness.
- Discovered street light electromagnetic interference premature death clusters.
- Developed the field of artificial lighting induced sickness, disease, and premature death.
- Linked electromagnetic fields from electrical fuse boards and meters to human illness and disease.
- Developed the field of power-line illness and disease.
- Developed the field of human AC “stray voltage” illness and disease.
- Found that the under wires on ladies brassieres are causing voltages and frequencies to appear between them when in electromagnetic radiation fields. This may induce illness and disease into women. A similar effect occurs with metal jewelry.
- Found that metal under wires in bras appear to be magnetized and interfere with the Earth's natural magnetic field which may lead to illness and disease.
- Found that metal mattresses are acting as an antenna for wireless energy and contain many frequencies of energy within them. This may be a health risk to the humans that sleep on them.
- Found that metal mattresses distort the Earth's natural magnetic field and long term exposure to them may be a human health hazard.

- Found that metal homes and metal studded homes appear to distort the Earth's natural magnetic fields and may cause long term health problems in the human.
- Found that conductive flooring, such as tile, may be electrified with AC voltage and may induce illness and disease into the human.
- Found that the water systems of homes and offices may be electrified with AC voltage and may induce illness and disease into the human.
- Found that the utility companies should never have grounded their energized conductors into the Earth as it electrifies it.
- Found hotspots of man-made radiation within the typical American home that extended exposure makes the human fall into illness and perhaps onto disease and premature death. In babies and children, it will likely cause developmental problems such as Autism and ADD.
- Found that wireless communications systems should never have been developed as it has a toxic effect on the human mind and body.
- Found that the 50 Hz and 60 HZ utility power systems, and wireless communication systems may be affecting the Earth's magnetic field and atmosphere.
- Found that the large scale removal of trees may have affected energy flows between the core of the Earth and the atmosphere and may have impacted the Earth's magnetic field and atmosphere.
- Found that the mining of metals and concentrating them into the cities may have affected the Earth's natural magnetic field and atmosphere.

#### Solar Radiation and Light:

- Developed the field of "Toxic Light".
- Found the solar radiation "Archimedes Death Ray" effect in modern society.
- Discovered the "Multiple-Sun" effect.
- Discovered the "Multiple-Shadow" effect.
- Developed the "Cloud Effect" of atmospheric solar lensing.
- Developed the "Turbulence Effect" of environmental solar lensing.
- Found that the human perception of blue sky is different from the photographed blue sky during an annular solar eclipse.
- Unnaturally high levels of solar radiation in modern human society.
- Found that the human indoor environment may have become toxic to cellular development due to the use of Low E coated double glazed glass, metal furniture, energy star lighting products, and radioactive ionizing smoke detectors.
- Tree canopy light interference (interference green light).
- Water light interference (reflection, lensing, and refraction).
- Light modification by plants.
- Radiation suppression by nature.
- Nighttime interference radiation.
- Atmospheric energy interference for solar radiation.
- Satellite, airplane, and structure solar radiation interference.
- Developed the LAMB theory = Light of Alien Moons is Baneful (Alien Moons = man made satellites, airplanes, chemical trails, smoke, pollution, artificial lighting, and so on.)
- Developed the LION theory = Light Interference Obliterates Nature.
- The "Extinction Wavelength" of light.
- Linked 'Bee Colony Collapse' disorder to solar radiation, man-made satellite eclipses of the Sun, airplane, microwave, radio, and power line interference effects.
- Development of scientific theory from religious scripture.

- Developed the solar photovoltaic power equations.
- Found the sources of solar photovoltaic power system overloading.

#### Solar Consulting Highlights:

- Commissioned the largest solar photovoltaic power generation system in the USA comprising of three hundred acres of single axis trackers with over ninety thousand solar modules. A one hundred and sixty million dollar project.
- Commissioned the world's largest CIGS thin film solar photovoltaic system.
- Operations and maintenance (O&M) manager of fifty million dollars of installed solar power generation systems.
- Project manager for the construction of a seven million dollar, one megawatt single axis tracking solar photovoltaic installation.
- Set up the solar photovoltaic design team for a large international company.

#### MDM Consortium, Dartmouth College & Columbia University

##### Site Director

Facility manager with control of four million dollars of assets and one million dollars in funds. Budget planning. Oracle applications and purchasing card administration. Development of long term plan for company direction and facility modernization. Designed and constructed computerized servo control and instrumentation systems. Reduced facility energy consumption. Scheduling of facility & research programs using MS project. Provide management reports to consortium members. Educate students. Manage regular and contract staff as needed and in accordance with labor laws. Implement and maintain compliance with current regulations including OSHA, NFPA, NEC, UBC and the Tohono O'odham Nation. Planned maintenance. Authored facility training manuals. On call for all systems.

#### W. M. Keck Observatory, University of California and NASA

##### Operations Manager

Lead position at the world's largest optical and infra red telescopes, assuming responsibility for the one hundred and fifty million dollar facility and all personnel. Development of new technical systems, budget management & scheduling of resources. Authored the facility training manual. On call for all systems. Engineer, procure and construct my solar powered green home during this time.

#### Isaac Newton Group: Higher Professional Technical Officer

Oversaw one of the world's largest observatory research facilities and all personnel during night time operations. Engineer, procure and construct new DIMM telescope. Project development, budget management & scheduling of resources. Solar power systems. Became fluent in Spanish language.

#### Regional Hospitals: Facilities Engineer and Biomedical Engineer

Facilities apprenticeship in the one thousand bed university research hospital. Engineer, procure and construct new wing of hospital. Responsible for biomedical and renal systems within the regions hospitals. On call for all systems.

#### Qualifications

Chartered Electrical Engineer, Bachelor of Engineering with Honors in Electrical and Electronics, Electrical Apprenticeship, Member of Institution of Engineering & Technology (IET) and Engineering

Council (ECUK).

## Training Courses Attended

Management Course (Five day residential), Various Single and Dual Axis Solar Trackers, Various Inverters, Matlab & Simulink (Five days), IDL, Varian Vacuum (Five days), OSHA 10

## Publications

Toxic Electricity, 2012

# Reflective "death ray" torments Vegas sunbathers

Fri, Oct 1 2010 By Damon Hodge

LAS VEGAS (Reuters) - MGM Resorts International is taking the heat for an intense beam of searing desert sunlight, jokingly dubbed the "death ray," that some hotel guests say poses a risk of severe burns to bathers lounging poolside.

[REDACTED]

# Ionizing Radiation Extends Life

<http://www.russia-ic.com/>

Low radiation doses extend human life, Russian biologist says. Ionizing radiation affects genes, which are responsible for cell aging.
