

## What It Takes To Get The Sheriff To Harass A Customer

Steven Magee had to call the Sheriff to his home due to a suspected utility company impostor who was refusing to show his Tucson Electric Power (TEP) customer service identification card. Steven Magee is an electrical fraud researcher and realized that his health, safety and reputation was at risk in the presence of a suspected impostor who had shown up to his home unannounced. Steven Magee had called 911 to be protected from this suspected impostor due to his fears. Instead the Sheriff engaged in the harassment of Steven Magee. We now take a look at the fraudulent "Evidence" that was used to harass Steven Magee for eleven nights. Here is the only piece of "Evidence" that was submitted:

Steven Magee video recorded the incident and this is the *Sheriff's report in italics* with **Steven Magee's comments in red** and **internet links in blue**. You will be surprised at what happened at the home of Steven Magee, [Chartered Electrical Engineer](#) and author of [Electrical Forensics](#). Looking at the “Evidence” we can see the following:

1. “Check for Dead/Stop meter” is the title of the “Evidence”. From this we understand that the electrical utility meter was suspected of being faulty. They further clarify this with the statement “METER USAGE DROPPING FOR 2 MONTHS”. We can conclude that a low electric utility meter reading for two months automatically triggers a surprise electric utility company visit to a customers home in Tucson, Arizona, USA.
2. “Threatening Customer” is an allegation. Steven Magee has never threatened a TEP worker. The threats that they are alleging are not documented. Steven Magee has been researching the frauds that TEP have engaged in at his home on past visits. TEP's fraudulent activities have been reported to their government regulator at the [Arizona Corporation Commission \(ACC\)](#), the [Better Business Bureau \(BBB\)](#), [Arizona Attorney General](#), and to the [Pima County Sheriff](#). One of these previous incidents was a suspected TEP impostor. They seemed to ignore these reports, which has now emboldened TEP to take their harassment of Steven Magee to the next level.
3. “Smart Meter Opt Out” is referring to the removal of an electrical utility meter that was installed onto Steven Magee's home without his informed consent. Steven Magee later discovered that the utility meter was emitting a constant level of radio frequency radiation every time he tested it of approximately 0.850 V/m. The [Tenmars TM-196 radio frequency \(RF\) meter manual](#) states “We recommend a maximum level of 0.614 V/m for prolonged exposure”. The video of the Smart meter testing can be seen here: [The Secret Microwave Transmitter](#). It was suspected to be the Smart network relay meter which is regarded as more biologically toxic than a standard TEP Smart meter which only pulses once every 30 seconds. Steven Magee developed [Electromagnetic Hypersensitivity](#) which is extensively proven to occur around utility company radio frequency (RF) Smart meters. The movie [Take Back Your Power by Josh del Sol](#) extensively documents the frauds that Smart meters have become associated with.
4. The “Curr Rd” and “Previous Reads” show that the electrical utility meter is working and correctly recording the energy consumed at the home. These meter reads need to be multiplied by 10 to get the actual kilowatt hours used at the home, as shown in the photograph on the next page. The power consumption on the “Evidence” is completely normal for the home which was largely empty from the end of November 2015 onward and was shutdown into vacation mode in December 2015. Note that the “Evidence” only appears to show meter reads from 9<sup>th</sup> December 2015 through to 19<sup>th</sup> February 2016, just two months and ten days that total eighty kilowatt hours of electrical consumption. These electric meter readings were consistent with his gas and water meter readings which also went low at the same time. The gas and water companies never made a surprise visit to his home. “Check for Dead/Stop Meter” is a fraudulent title, as the electric utility meter is not dead and has not stopped, it is accurately recording the completely normal lower electric consumption of the largely empty home that was shutdown into vacation mode in December 2015.

Utility meter readings need to be multiplied by ten to get kilowatt hours consumed.

So as we can see, there is no “Evidence” in the above that is sufficient to disconnect the utility electricity to Steven Magee's home without any legally required notice per [State Of Arizona Administrative Code](#). So let us now take a look at the Sheriff's report for further “Evidence”:

*I made contact with Mr. Magee first, who identified himself via his Arizona driver's license. He recorded my entire encounter with him, and with Mr. Manuel, and Mr. Manuel's supervisor, on two different cell phones. (It was a high definition video camera which switched to a cell phone after the memory card filled up) He stated he no longer lived at the Desert Lantern address, and had recently moved. He said there was no electrical draw for power at the Desert Lantern address, and he was only there today to work on the property for a possible rental or sale.*

The Sheriff is aware of the reason why the home power consumption was low and that the reported low electrical utility meter readings are normal. The situation with the home was that Steven Magee had been spending the bulk of his time at his girlfriend's home from the end of November. His home was placed into vacation mode with most electrical items shut down in December, with the exception of the various security systems and one bedroom. Steven Magee spent almost two weeks in Hawaii in December 2015 and was not at the home or in the State of Arizona. A bed had been left in the home for Steven Magee to spend the night there and to take daytime naps. Steven Magee needs AC utility electricity at the home to power his “RX-Only” life support machine that he is prescribed to use daily by his doctor. The billed electrical utility meter readings for the home were completely normal for the connected electrical loads and the suspected TEP impostor had already been informed of this fact. Steven Magee had already shown the suspected TEP impostor the largely empty home through the front door. The largely empty home was put up for sale in April 2016 as Steven Magee continued the process of moving into his girlfriend's home.

*Mr. Manuel advised me he was dispatched to Mr. Magee's house in reference to a very low meter reads for the last several months. In the last four months of meter reads, show only eight kilowatt hours of actual power being used. This flagged in the TEP system, and he was dispatched to the house to make sure the meter was not broken.*

Note that the submitted paperwork “Evidence” only appears to show meter reads from 9<sup>th</sup> December 2015 through to 19<sup>th</sup> February 2016, just two months and ten days that total eighty kilowatt hours of

electrical consumption. These electric meter readings were consistent with gas and water meter readings which also went low at the same time. The last four months of TEP utility meter reads as billed to Steven Magee are as follows:

02/10/2016: 30 kilowatt hours

1/12/2016: 40 kilowatt hours

12/10/2015: 220 kilowatt hours

11/07/15: 790 kilowatt hours

Total kilowatt hours used over the last four months was 1,080 and not the 8 that was reported. Over the last several months, Steven Magee had a high electrical consumption that was consistent with him owning an air conditioned home. The readings were consistent with the previous year. The account was fully paid in accordance with TEP's requirements. Steven Magee has a decade of excellent payment history with TEP.

The law states: "A person who knowingly makes a false or misleading material statement to a public servant is guilty of a gross misdemeanor. 'Material statement' means a written or oral statement reasonably likely to be relied upon by a public servant in the discharge of his or her official powers or duties." <http://blog.seattlepi.com/seattle911/2009/10/28/whats-the-penalty-for-lying-to-a-police-officer/>

*Mr. Manuel showed me the paperwork showing the meter reads from the last several months. He was dispatched to "check for dead/stop meter." There was also a highlighted note on the paperwork stating; "Threatening customer." It was referring to Mr. Magee and previous incidents which TEP has had with him.*

Note that the submitted paperwork "Evidence" only appears to show meter reads from 9<sup>th</sup> December 2015 through to 19<sup>th</sup> February 2016, just two months and ten days that total eighty kilowatt hours of electrical consumption. These electric meter readings were consistent with gas and water meter readings which also went low at the same time. Steven Magee has never threatened a TEP worker. TEP has engaged in previous incidents of fraudulent activity at Steven Magee's home which were reported by Steven Magee to their government regulator at the [Arizona Corporation Commission \(ACC\)](#), [Better Business Bureau \(BBB\)](#), [Arizona Attorney General](#) and to the [Pima County Sheriff](#). One of these previous incidents was a suspected TEP impostor. They seemed to ignore these reports, which has now emboldened TEP to take their harassment of Steven Magee to the next level.

The TEP meter reading information that the Sheriff has reported is fraudulent. The TEP electrical meter reads billed to Steven Magee for the last year were as follows:

02/10/2016: 30 kilowatt hours

1/12/2016: 40 kilowatt hours

12/09/2015: 220 kilowatt hours

11/06/2015: 790 kilowatt hours

10/08/2015: 1,090 kilowatt hours

09/09/2015: 1,420 kilowatt hours

08/10/2015: 1,480 kilowatt hours

07/10/2016: 1,610 kilowatt hours

06/10/2015: 830 kilowatt hours

05/11/2015: 590 kilowatt hours

04/10/2015: 460 kilowatt hours  
03/12/2015: 290 kilowatt hours  
All payments were in good standing.

The law states: “A person who knowingly makes a false or misleading material statement to a public servant is guilty of a gross misdemeanor. ‘Material statement’ means a written or oral statement reasonably likely to be relied upon by a public servant in the discharge of his or her official powers or duties.” <http://blog.seattlepi.com/seattle911/2009/10/28/whats-the-penalty-for-lying-to-a-police-officer/>

They continue on and illegally disconnect the utility electricity to the home. This is legally called a “Termination Of Service Without Notice” in the State of Arizona, USA. The Sheriff and TEP have now disabled the majority of Steven Magee's home security systems and the home is now vulnerable to a break in. The alarm system will be non-functional in a few days as the back up battery goes flat. They may have invalidated Steven Magee's home insurance policy by rendering the majority of his home security systems non-functional.

TEP's government regulator states Rule R14-2-211B of the Arizona Administrative Code: “In addition, a utility company may disconnect service without notice for any of the following reasons:

- The existence of an obvious hazard to the safety or health of the consumer or the general population.
- The utility has evidence of meter tampering or fraud.”

None of the conditions existed at Steven Magee's home and therefore State of Arizona Administrative Code was broken by:

- Tucson Electric Power (TEP)
- Pima County Sheriff's Department

The only thing that State of Arizona Administrative Code possibly allowed them to do at this point was to give Steven Magee notice of a future electrical disconnection. At that point they were required to peacefully leave Steven Magee's property with the power on until the disconnection date arrived: “Rule R14-2-211C of the Arizona Administrative Code states that after proper notice, the utility company may disconnect your service if you are in violation of any of the utility's tariffs, or for reasons such as:

- Failure to pay a delinquent bill
- Failure to meet or maintain your deposit.
- Failure to provide the utility company reasonable access to its equipment and property.
- Or when you break a written contract for service between you and the utility company.”

<http://www.azcc.gov/divisions/utilities/electric/faqs.asp#m>

TEP always had full access to their equipment by showing their customer service identification cards to Steven Magee. At no point was a TEP employee that showed their customer service identification card to the customer prevented from working on Steven Magee's property. As such, it appears that TEP could not even use the State of Arizona Administrative Code to give notice to Steven Magee of a future electrical disconnection. The suspected TEP impostors were treated at all times in accordance with

TEP's publicly stated policy: “TEP warns to always check the IDS of employees or contractors.”  
<http://www.fox10tv.com/story/27896572/scams-targeting-tep-customers-generate-hundreds-of-complaints>

**We now know what it takes to get a Sheriff to harass a law abiding, fully paid utility customer with completely normal electrical power consumption.**

A complaint was filed against the Sheriff to [Pima County Sheriff Internal Affairs](#). Complaints about TEP were filed to:

- [Arizona Attorney General](#)
- [Arizona Corporation Commission \(ACC\)](#)
- [Better Business Bureau \(BBB\)](#)
- [Tucson Electric Power \(TEP\)](#)
- [Pima County Sheriff's Department](#)

The forced disconnection of utility electricity to the home was illegal per the [State Of Arizona Administrative Code](#) for the following reasons:

- Rule R14-2-211B: None of the State Of Arizona Administrative Code legal conditions existed at the home for a legal forced disconnection of utility electricity without notice to occur.
- Rule R14-2-211B: The customer was not informed at the time of the disconnection without notice what the State Of Arizona Administrative Code legal reason was for the forced electrical utility disconnection.
- Rule R14-2-211B: The utility company declined to specify a State Of Arizona Administrative Code legal reason for the forced disconnection of utility electricity without notice to the home during the eleven nights that the home was disconnected.
- Rule R14-2-211A: They disconnected without notice the home of a person on a “RX-Only” prescription life support machine that requires AC electricity.
- Rule R14-2-211A: They rendered the home uninhabitable for a person on a “RX-Only” prescription life support machine that requires AC electricity.
- Rule R14-2-211D: No legally required written notice period had been given for the unannounced electrical disconnection of the home of a customer on a “RX-Only” prescription life support machine that requires AC electricity.
- Rule R14-2-211E: At least five days of written notice of electrical disconnection were not provided to the customer who is on a “RX-Only” prescription life support machine that requires AC electricity.
- Rule R14-2-208D: They refused to reconnect the utility electricity after four separate requests by Steven Magee. He eventually had to place two 911 calls reporting ongoing harassment by TEP to their customer to have them escorted to the home by the Sheriff where they were forced to reconnect the home as a result of the 911 calls.  
[Reporting Harassment To 911 To Get Utility Electricity Reconnected](#)
- They used suspected impostors to perform the disconnection without notice of utility electricity: “TEP warns to always check the IDS of employees or contractors.”

<http://www.fox10tv.com/story/27896572/scams-targeting-tep-customers-generate-hundreds-of-complaints>

- The suspected impostors had been legally trespassed from the property by the customer and they then trespassed onto the customer property to perform the illegal electrical utility disconnection: “TEP warns to always check the IDS of employees or contractors.”  
<http://www.fox10tv.com/story/27896572/scams-targeting-tep-customers-generate-hundreds-of-complaints>
- Misdemeanor Assault: One of the suspected impostors had already hit the customer.  
<https://enlightenme.com/misdemeanor-assault/>
- The electricity bill for the home was paid in full per TEP's billing cycle.
- No discussion had occurred with the customer as to what equipment, products, humans, children, babies, animals and plants may be damaged by a prolonged power outage of eleven nights.
- No discussion had occurred with the customer about how a prolonged eleven night power outage would affect his business that is registered at this address.
- No discussion had occurred with the customer about how a prolonged eleven night power outage would affect his “RX-Only” prescription life support machine that requires AC electricity.
- The customer had a decade of excellent payment history with the electrical utility.

The customer had called the Sheriff due to his fear of suspected TEP impostors that were known to engage in illegal activities in Tucson and past fraudulent activities at the home of Steven Magee. The customer was shocked when the Sheriff then facilitated the illegal disconnection of the fully paid home. The Pima County Sheriff rather than protecting the customer who has multiple documented health conditions and a toddler from four suspected impostors, actually engaged in illegal activities at the customers home! The customer was correct in his assessment that he was at risk on multiple fronts and needed to call 911 for the following reasons:

- He was assaulted by one of the suspected impostors.
- The suspected impostors engaged in an illegal disconnection of a fully paid customers home with completely normal electrical usage per State of Arizona Administrative Code.
- The Pima County Sheriff facilitated the illegal disconnection of the fully paid customers home. That is to say that the Pima County Sheriff and TEP broke State of Arizona Administrative Code.
- Trespassing occurred on the customers property by suspected impostors.
- All of the above occurred in the street in full view of the customers neighbors.
- They rendered the home useless to the customer for eleven nights.
- Damaged occurred at the customers home from the eleven night power outage.

The assessed activities that the Pima County Sheriff and Tucson Electric Power engaged in at the customer's home were:

1. Harassment: Intimidation and inducing fear into a customer that has multiple documented

health conditions by the withholding of customer service identification cards.

[How To Deal With A Possible Utility Company Imposter](#)

2. Misdemeanor Assault: The customer was hit.  
[Suspected TEP Electrical Utility Company Impostor Hits TEP Customer](#)
3. Illegal disconnection of utility electricity per [State Of Arizona Administrative Code](#).
4. Shame: Illegal disconnection of the electricity occurred in full view of the customers neighbors with a Pima County Sheriff present. Three utility trucks and one Sheriff's truck were at the property which is in full view of many neighbors.  
[TEP Forced Disconnect On Fully Paid Customer](#)
5. Extortion/Blackmail: Attempting to remove the customer's legal rights as a condition of electrical utility re-connection and prolonging the power outage by doing so.  
[Reporting Ongoing TEP Harassment to the Sheriff 29 February 2016](#)
6. Daily Harassment: Willfully prolonging the power outage at the fully paid home causing hardship to the customer.
7. Daily Harassment: Electrical utility disconnection of the home of a customer who is on an "RX-Only" prescription life support machine that only functions on AC electricity.
8. Vandalism: Damage occurred at the customer home from the illegal prolonged power outage.

The video highlights of the entire event can be seen here:

[Electrical Utility Company Harasses Electrical Fraud Researcher](#)

[Reporting Ongoing TEP Harassment to the Sheriff 29 February 2016](#)

[Reporting Harassment To 911 To Get Utility Electricity Reconnected](#)

The TEP "Dead/Stop Meter" was never replaced and is still there today. Electrical consumption continues to be accurately recorded at low levels. To date, no one has been prosecuted for the TEP frauds and related abnormal TEP company utility activities occurring at Steven Magee's home.

A detailed discussion of the known electrical frauds that utility companies engage in can be found here:

[www.environmentalradiation.com](http://www.environmentalradiation.com)

This is the end of the "Evidence" analysis and Steven Magee's responses to it. Supporting information is on the following pages.
