Say “No” to Tucson Transmitting Utility Meters!

The Tucson electric, gas, and water radio frequency transmitting utility meters use the Itron OpenWay wireless communication equipment that operates in the Industrial, Scientific and Medical (ISM) bands at frequencies from 902 MHz to 928 MHz and from 2,400 MHz to 2,483 MHz. Also, a small number of devices incorporate wireless modems operating at frequencies 824-849 MHz and 1,850-1,910 MHz designated for the cellular operators (Cell Relays constitute about 1% of all the OpenWay wireless devices and can be mounted on poles or as part of a meter). The top reported Radio Wave Sickness symptoms that may result in order of frequency are: 1. Fatigue. 2. Sleep disturbance. 3. Headaches. 4. Feeling of discomfort. 5. Difficulty in concentrating. 6. Depression. 7. Memory loss. 8. Visual disruptions. 9. Irritability. 10. Hearing disruptions. 11. Skin problems. 12. Cardiovascular. 13. Dizziness. 14. Loss of appetite. 15. Movement difficulties 16. Nausea. Source: Symptoms experienced by people in the vicinity of a cellular phone base station, Santini 2001, La Presse Medical.

- We do not consent to be irradiated by known biologically harmful radiation emissions that may lead to Neurasthenia.
- We do not agree to being part of a mass population radiation experiment that is already known to be damaging many people's health.
- If we develop Smart Meter Sickness, Radio Wave Sickness or Electromagnetic Hypersensitivity from your known biologically harmful radiation emissions, then you will have to pay us every month to cover the medical bills for the damage your radiation transmitters are doing to us and compensate us for any related sickness, disease, financial, or emotional distress that may result in the long term.
- These radiation meters violate the right to a healthy and safe life laws.
- If someone tries to install an unwanted radiation transmitting utility meter at your property, request the following information from them: What is your name, position, contact phone and address? Let them know that this information is required by your legal representative.

Identifying Tucson Transmitting RF Utility Meters

Electric Meter: Itron Centron

Gas Meter: Itron 40G/100G

Water Meter: Itron 100W

Lyon, France, May 31, 2011: The WHO/International Agency for Research on Cancer (IARC) has classified radiofrequency electromagnetic fields as possibly carcinogenic to humans (Group 2B), based on an increased risk for glioma, a malignant type of brain cancer
